Michael Lindsey

quantumtative.github.io

POSITIONS

Department of Mathematics, University of California, Berkeley
    Assistant Professor, 7/2022 - present

Courant Institute of Mathematical Sciences, New York University
    NSF Postdoctoral Fellow, 9/2019 - 6/2022

EDUCATION

University of California, Berkeley, PhD in Applied Mathematics, 8/2019
        Advisor: Lin Lin

Stanford University, BS in Mathematics (Honors), 6/2015

AWARDS

- John Todd Award, Oberwolfach Foundation (2022)
- NSF Mathematical Sciences Postdoctoral Research Fellowship (2019)
- SIAM Student Paper Prize (2019)
- Bernard Friedman Memorial Prize in Applied Mathematics, UC Berkeley (2018) [*top applied math graduate student*]
- NSF Graduate Research Fellowship (2016)
- National Defense Science and Engineering Graduate (NDSEG) Fellowship (declined) (2016)
- Kennedy Thesis Prize, Stanford University (2015) [*top undergraduate thesis in the natural sciences*]
- Firestone Medal for Excellence in Undergraduate Research, Stanford University (2015)
- J.E. Wallace Sterling Award for Scholastic Achievement, Stanford University (2015) [*awarded to top 25 graduating seniors in the School of Humanities and Sciences*]

RESEARCH INTERESTS

Numerical analysis, optimization, Monte Carlo methods, semidefinite programming, electronic structure theory, quantum many-body physics

PREPRINTS

Michael Lindsey. **Fast entropically regularized semidefinite programming.** Preprint, arXiv:2303.12133.

Yoonhaeng Hur, Jeremy G. Hoskins, Michael Lindsey, E.M. Stoudenmire, and Yuehaw Khoo. **Generative modeling via tensor train sketching.** Preprint, arXiv:2201.11788.

Yuehaw Khoo and Michael Lindsey. **Scalable semidefinite programming approach to variational embedding for quantum many-body problems.** Preprint, arXiv:2106.02682.

Yian Chen, Yuehaw Khoo, and Michael Lindsey. **Multiscale semidefinite programming approach to positioning problems with pairwise structure.** Preprint, arXiv:2012.10046.

PUBLICATIONS

Huan Zhang, Robert J. Webber, Michael Lindsey, Timothy C. Berkelbach, and Jonathan Weare. **Understanding and eliminating spurious modes in variational Monte Carlo using collective variables.** *Physical Review Research*, to appear.

Peter Lunts, Michael Albergo, and Michael Lindsey. **Non-Hertz-Millis scaling of the antiferromagnetic quantum critical metal via scalable Hybrid Monte Carlo.** *Nature Communications*, to appear.

INVITED PRESENTATIONS

A sampling of QMC methods
Sanibel Symposium, St. Augustine, 2/2023

Thermal state sampling for numerical linear algebra
Sampling, Transport, and Diffusions, Flatiron Institute, 11/2022

Mathematical aspects of Green's function methods
Solid Math, SISSA, 9/2022

Thermal state sampling for numerical linear algebra
Youth in High Dimensions, SISSA, 6/2022

Thermal state sampling for numerical linear algebra
Tripods@Duke, Duke University, 6/2022

Two topics in Monte Carlo for scientific computing
SCAN Seminar, Cornell University, 5/2022

Quantum embedding with lower bounds
Multiscale Approaches in Quantum Mechanics, IPAM, 3/2022

Many-body perturbation theory and Green's function methods
Multiscale Approaches in Quantum Mechanics, IPAM, 3/2022

Tools for multimodal sampling
Applied Math Seminar, Duke University, 12/2022

Tools for multimodal sampling
Applied Math Seminar, Stanford University, 12/2022

Tools for multimodal sampling
PDE-Applied Math Seminar, University of Maryland, 10/2022

Tools for multimodal sampling
Mathematics of Deep Learning Seminar, Flatiron Institute, 10/2021

Tools for multimodal sampling
CAM Colloquium, University of Chicago, 10/2021

Embedding approaches for classical and quantum statistical mechanics
Applied Mathematics Seminar, UC Berkeley, 9/2021

Scalable variational embedding for quantum many-body problems
SIAM Conference on Mathematical Aspects of Materials Science, 5/2021

Optimization for variational Monte Carlo with neural quantum states
Modeling and Simulation Group Seminar: Machine Learning in Science at NYU, Courant Institute, 4/2021

Quantum many-body physics and semidefinite programming
SIAM CSE, 3/2021

Variational embedding for quantum many-body problems
QMC Seminar, Flatiron Institute, 6/2020

Optimal transport via a Monge-Ampère optimization problem
SIAM Conference on the Mathematics of Data Science, 5/2020

Variational embedding for quantum many-body problems
"Revolutionary Advances in Correlated Electron Materials" MURI Group Meeting, 4/2020

Variational embedding for quantum many-body problems
Modeling and Simulation Group Seminar, Courant Institute, 10/2019

Toward sharp error analysis of extended Lagrangian molecular dynamics for polarizable force field simulation
Ki-Net Young Researchers Workshop, University of Maryland, 10/2019

Variational embedding for quantum many-body problems
Modeling and Simulation Group Meeting, Courant Institute, 10/2019

Toward sharp error analysis of extended Lagrangian molecular dynamics for polarizable force field simulation
Analysis Seminar, Courant Institute, 9/2019

Semidefinite relaxation of multi-marginal optimal transport, with application to strictly correlated electrons in second quantization
ICIAM, 7/2019

Strictly correlated electrons in second quantization at finite temperature
Workshop: Optimal Transport Methods in Density Functional Theory, BIRS, 2/2019

Adaptive compression for Hartree-Fock-like equations
SIAM Conference on Applied Linear Algebra, 5/2018

A classical statistical mechanics approach to understanding Green's function methods and the Luttinger-Ward formalism
Workshop: Mathematical Methods in Quantum Chemistry, MFO, Oberwolfach, 3/2018

Optimal transport via a Monge-Ampère optimization problem
Bay Area Differential Geometry Seminar, UC Davis, 4/2017

Optimal transport via a Monge-Ampère optimization problem
Applied Mathematics Seminar, UC Berkeley, 11/2016

Optimal transport via a Monge-Ampère optimization problem
Workshop: Computational Optimal Transportation, Centre de Recherches Mathématiques, 7/2016

TEACHING

University of California, Berkeley
- Spring 2023: Math 128B (Numerical Analysis)
- Fall 2022: Math 228A (Numerical Solution of Differential Equations)

New York University
- Spring 2022: Linear Algebra I (graduate)
- Fall 2021: Mathematical Statistics
- Spring 2021: Linear Algebra I (graduate)
- Fall 2020: Calculus I

University of California, Berkeley (Graduate Student Instructor)
- Spring 2018: Math 54 (Linear Algebra and Differential Equations)
- Spring 2016: Math 53 (Multivariable Calculus)
- Fall 2015: Math 1B (Calculus)

OTHER ACTIVITIES

Referee for *SIAM Journal on Scientific Computing, SIAM Journal on Optimization, Journal of Scientific Computing, Physical Review Letters, Physical Review B, Physical Review X Quantum, Physical Review Research, Foundations of Computational Mathematics*

Senior personnel for NSF Award No. 2134467, "Divide-and-Conquer Approach for Strongly Interacting Systems via Convex Optimization"

CV current as of March 24, 2023.
